

**GUARANTEES HIGH AVAILABILITY
OF YOUR STRATEGIC ONLINE
SERVICES AND ENSURES
THE MONITORING AND DEFENCE
OF YOUR DOMAIN NAMES.**

With nearly 30 years of experience at the service of its customers and partners, Nameshield is the French provider of reference for domain names management, security and associated services. Recognized by its peers, Nameshield is the first French registrar to be certified ISO 27001.

As a sovereign registrar, Nameshield maintains its societal commitment by being 100% owned by its employees and by the Esperancia endowment fund.

Our strengths:

Nameshield stands out from other actors of the market with many strong and differentiating points:

- Risk management for domain names and associated services
- Adaptation to complex environments
- Maximum level of security and recognition from our peers
- Internal development policy / proprietary solutions
- ISO 27001 certified
- ANSSI compliance
- Dedicated support and expert teams

Our expertise, our services:

Cybersecurity

Expert in the protection of strategic domain names and associated services, Nameshield guarantees high availability and integrity, by offering highly resilient and efficient services (DNS / TLS / Registry lock / etc.), threat detection systems and remediation solutions.

Intellectual property

From domain names, web and social networks monitoring, to recovery procedures and paralegal actions (UDRP / URS / takedown / buyback / etc.), our in-house legal department ensures the monitoring and the defence of your trademarks on the Internet.

Domain names

Nameshield, ICANN accredited registrar, provides a premium domain names service to businesses, assisting them in the complex management of their portfolios and ensures the perfect consistency of their digital strategy.

Our customers' testimonials:

Thanks to the DNS Premium of our provider Nameshield, we could set up a detailed management of the Time to Live (TTL), through the secured platform, allowing us to build Agile developments and to rely on the solution to define back-up procedures. The anti-DDoS filter integrated to the solution is important and pertinent in front of ever increasing attacks.

Jérôme GERMAIN, IT Department, SEB

Nameshield was able to understand quickly the complexity of our organization and was able to adapt to our requirements in term of invoicing while implementing some specificities for technical and administrative management. We have won a trustful partner for domain name management, an expert at our side to help us take the right decisions. We have been appreciating on a day to day basis our partnership with Nameshield: availability, reactivity, proactivity, efficiency, expertise, customer friendliness. A lot of qualities which are indeed seldomly encountered altogether...

Isabelle PONSOLLE, Digital Customer Experience/Web Performance Manager, Schneider Electric

Every day, our domain names service management deals with new problems and challenges related to the evolution of the web. That's why, Nameshield is our reference partner.

Besides its responsiveness and its dedicated customer service, we call on Nameshield's expertise in Intellectual Propriety strategy on a daily basis. With its full range of services and its many resources, Nameshield meets our high expectations..
