

## SSL/TLS certificates: switch to HTTPS

The web now communicates in an encrypted way, it imposes HTTPS and the padlock in the browser address bar. SSL\* certificates make it possible to obtain this display. Without these security indicators, the words «Not secure» are displayed and clearly encourage web users to leave the visited website.

*\*The standard reference is now "TLS", but the market continues to use the term SSL to refer to these certificates.*

## HTTPS is essential

SSL certificates ensure website authentication and the encryption of data exchanged with it: integrity and confidentiality of exchanges.

All market browsers have followed Google in imposing the padlock from the moment a user arrives on a web browsing homepage. Visual processing of security indicators is not the same on all browsers but the overall idea remains the same: no HTTPS causes a security alert.

A company's digitalization increases the number of websites and creates new challenges:

- Having a comprehensive and up-to-date inventory;
- Ensuring the continuity of services during certificate renewal process;
- Protecting against cybersecurity risks;
- Controlling budgets.

### Nameshield's approach:

Identify all existing certificates for a better understanding

Analyze existing certificates

Define the certification strategy

Order efficiently

Access Monitoring tools

Simply renew, replace or change

## Choose Nameshield for a complete offer

With more than 10 years' experience in certificate management, Nameshield offers you the benefit of its expertise and privileged relationships with the Certification Authorities.

### A complete range to cover all your needs:

- Five accredited Certification Authorities
- All levels of authentication: EV, OV, DV
- All types of SSL certificate: Standard, Wildcard, SAN, RGS \*
- Other certificates: code signing, individual certificates (including RGS \*\*)

### Testimonial:

*«Nameshield's expertise and support have enabled us to implement a complete process for our SSL certificate management: from identifying our requirements to certificate delivery. Nameshield supports us on the strategy to use in terms of validation and manages the relationship with several Certificate Authorities. The value of this trusted relationship is priceless.»*

Digital Customer Experience

The screenshot shows the 'Certificate portfolio' dashboard. It includes a navigation bar with 'nameshield SSL Area', 'Order', 'Portfolio', 'Tools', and 'Organization'. The main content area features a 'Welcome to your certificate portal' message, a search bar for 'Department / Subsidiary' (set to 'WEIMANN-MCCULLOUGH'), and a bar chart titled 'Certificates approaching expiry date' showing the quantity of certificates by authentication level from March 2020 to March 2021. Below the chart is a table of certificates with columns for ID, Department / Subsidiary, Common Name, Certificate Authority, Process, Authentication level, Start date, End date, Days before expiration, Status, and Details. The table lists several certificates, including those from Geotrust, Thawte, Certigna, and GlobalSign.

ID	Department / Subsidiary	Common Name	Certificate Authority	Process	Authentication level	Start date	End date	Days before expiration	Status	Details
13	KRAJCIK LTD	blanda.com	Geotrust	QuickSSL Premium Pack 4 SAN	DV	09/01/2020	09/01/2021	-524	Active	Details
14	HOWE, HARRIS AND MOSCISKI	bruen.com	Geotrust	True BusinessID	OV	03/01/2019	03/01/2021	-340	Active	Details
29	KRAJCIK LTD	wilderman.net	Geotrust	True BusinessID avec EV	EV	08/01/2019	08/01/2020	-128	Active	Details
38	GERHOLD, STOLTENBERG AND GREEN	conroy.info	Thawte	SSL Web Server avec EV (SAN)	EV	05/01/2019	05/01/2021	-401	Active	Details
58	KRAJCIK LTD	hickle.biz	Certigna	Certigna Server Client RGS *	OV	05/01/2020	05/01/2022	-766	Active	Details
69	HOWE, HARRIS AND MOSCISKI	deckow.biz	GlobalSign	Organization SSL	OV	11/01/2019	11/01/2021	-585	Active	Details

### What you benefit from:

- A reliable team that knows its customers and assists you throughout the certificate acquisition process
- A privileged intermediary between you and the different Certification Authorities to gain in efficiency and better manage your budget
- Assistance with your management strategy
- An intuitive platform for your certificate management
- Direct access to Nameshield's other services for securing your digital assets: domain names, DNS
- Flexible and centralized billing

### ISO 27001 certified:

- The entire Nameshield certificate activity is integrated into our ISO 27001 certification scope
